CHOOSE YOUR CARD NOW!

GpayBack offers the best value for money in cryptocurrency cards: high limits, low costs and **BIG REWARDS**.

GPay Earn pays you interest on the \$GPAY tokens you have in staking. Payments are calculated and made based on it. This means an increase in value in USD when \$GPAY grows.

E.g. If you have an active GPay PRO stake acquired during the launch phase and the price of GPAY has increased by a factor of 5 after listing, the USD equivalent in interest is \$1815 per year!

** MarketPlace Experiences: Buy experiences (Rentals, rent a car, trips, tickets, subscriptions, events...) around the world, without KYC on Kode.io, with discounts and special promotions for having our GpayBack card.

* Staking your GPAY tokens for the assigned USD value to receive your personal GPay MasterCard!

** The GP Card is based in Mexican Peso (MXN). Bank commissions are exclusive and determined by the respective institutions.

THE FUTURE

- Ⓞ Even lower loading rates using \$GPAY
- Ⓞ More GPay Card levels
- Ⓞ Promotions using the GPay Card with participating companies.
- Ⓞ Additional blockchain support.
- Ⓞ POS payment system for network of associated businesses

REFERRAL MARKETING

At GpayBack, we have decided to adopt a more efficient and economical strategy to publicize our card and the services we offer. Instead of investing in expensive advertising campaigns in digital media, we are focusing our efforts on a viralization method that will allow us to distribute our marketing budget among our users, through a simple but powerful referral marketing.

This strategy will give you the opportunity to generate commissions for each direct and indirect referral you send us, thus incentivizing the organic growth of our user base, and the usability and price of our token.

DIRECT INVITATION
INDIRECT INVITATION 2 LEVEL
INDIRECT INVITATION 3 LEVEL
